DAILY U. S. RAW SUGAR SPOT PRICE QUOTATION  
AND APPLICABLE PRICE CORRIDOR

MARKET REVIEW

Reported sales of sugar by primary distributors were at a record rate during January, February and April of this year. Sales in May were the highest since 1951. The demand for sugar was not as strong for June, and the distribution, according to preliminary reports, of 959,000 tons was the lowest since 1968 when sales were reported at 939,000 tons. Reports for the first two weeks in July also show low distribution figures. The distribution of 152,000 tons for the week ending July 6, 1974 was the lowest for the first week in July since 1963. And the 218,000 tons delivered during the week ending July 13, 1974 were 12,000 tons less than for the same week a year earlier.

Sales in 1974 through July 13 totaled 6,010,000 short tons, raw value, according to preliminary reports. This compares with distribution of 5,868,000 tons and 5,810,000 tons, respectively, during the same periods of 1973 and 1972. However, at year-end 1973 there were 6,000 tons of sugar constructively delivered, i.e., sugar sold and charged to quotas during December 1973 but physically delivered in January and February of 1974. Constructive deliveries totaled 130,000 tons in 1972 and 88,000 tons in 1971. Therefore, physical deliveries through July 13, 1974 totaled 6,016,000 tons compared with 5,998,000 and 5,898,000 tons, respectively, physically delivered through July 13, 1973 and 1972.

Regionally, deliveries of refined sugar reported by states of destination totaled 87,793,000 hundredweight for the first five months of 1974. This was an increase of 5.4 percent over the same period last year with increases occurring in all five of the geographic regions. The West had the greatest increase, 9.2 percent, followed by the North Central which was up 6.6 percent. Deliveries in the South were up 5.4 percent and in the Mid-Atlantic and New England regions deliveries were up 1.7 and 1.3 percent, respectively.

Individually, 37 states received more sugar during January-May 1974 as compared with those months of 1973. Twelve states received less, and one state, Rhode Island, received the same amount of sugar for the first five months of 1973 and 1974. There were 10 states with reported increases of more than 100,000 hundredweight. Illinois had the largest increase, 1,353,000 hundredweight, followed by California up 631,000, Delaware up 412,000 and Michigan up 369,000. Of the 12 states where reported deliveries declined, only Missouri was down as much as 100,000 hundredweight.

Preliminary reports of stocks of raw and refined sugar held by all primary distributors on June 30, 1974 totaled 1,949,000 short tons, raw value. This was 85,000 tons less than a month earlier and 342,000 tons less than at the end of June last year. Beet processors' stocks of 1,043,000 tons were down 80,000 tons from the end of May and down 48,000 tons from the end of June last year. Cane sugar refiners reported 704,000 tons, raw value, of raw and refined sugar on hand on June 30, 1974. This was 58,000 tons more than at the end of May and 224,000 tons less than on June 30 last year.

The daily spot quotation for raw sugar, duty paid and delivered to New York (No. 10 Contract of the New York Coffee and Sugar Exchange), averaged 26.30 cents per pound during June, up from 23.05 cents during May and up 157 percent from June 1973 average of 10.25 cents. The average price for June was 121 percent above the price objective as specified in the present Sugar Act.

The daily spot quotation went down 50 points to 26.75 cents on June 21. This was the first drop in the spot price since May 28, 1974. On June 24, the price declined again to 26.50 cents. This price held steady through July 1. On July 2, the domestic spot price for raw sugar was down to 26.00 cents per pound where it remained through July 9. On July 10 the price increased 50 points to 26.50. The 26.50 held on July 11 but was up another 50 points on July 12 to 27.00 cents. The quotation remained unchanged on July 15. Another 50 point increase on July 16 put the spot quotation to 27.50 on July 16 and 17. On July 18 the price was up to 28.00 and on July 19 the price jumped to 29.50. The July 1-19 average of the spot price was 26.86 cents per pound as compared with 10.10 cents for the same period last year.

The wholesale refined sugar price quotation for refined sugar sold in 100-pound bags--the basis pack--remained unchanged, with few exceptions, for the last part of June and the first half of July. One of the few changes during this period was made by interested sellers of refined cane sugar in the Intermountain-Northwest region. They announced a wholesale price quotation to be effective on July 1 of 30.00 cents per pound for 100-pound bags.

Cane sugar refiners in the Northeast announced an increase of 1.10 cents per pound. Some sellers put the new price of 33.10 cents into effect at the close of business July 3 while other sellers shipped at the old price of 32.00 through July 19. Sellers of refined cane sugar in the Southeast, Gulf and Chicago-west region also announced a quotation of 33.10 cents to become effective at close of business July 19.

In the Pacific Coast region, the wholesale price for refined cane sugar in 100-pound bags was quoted at 31.60 cents per pound effective July 19. The only increase in refined beet sugar in 100-pound bags was announced in the Eastern region. Effective on July 16, the new beet sugar quotation was 32.70 cents per pound.

Shown below are the price quotations on July 15, 1974 for refined sugar sold at wholesale in 100-pound paper bags and in bulk by regions. Significant variations of actual price from quoted price may be found in certain regions, reflecting discounts resulting from competitive conditions.

The U.S. average retail price for refined sugar sold in 5-pound paper bags averaged 28.32 cents per pound in June, up from 24.84 cents in May and 14.84 cents in June of last year for an increase of 91 percent during the 12-month period.

The spot price for world bulk raw sugar (No. 11 Contract of the New York Coffee and Sugar Exchange) f.o.b. and stowed at Greater Caribbean ports averaged 23.67 cents per pound during June, up from 23.65 cents in April and 9.77 cents in June of 1973. During June of this year, the price ranged from a low of 21.75 cents on June 24 to a high of 26.00 on June 7. For the period July 1-19 the world price averaged 23.77 cents, up from 9.70 cents for the same period in July 1973. From July 1, 1974 through July 19, the world price ranged from a low of 22.50 cents per pound on July 2 to a high of 26.75 on July 19.

Production of cane sugar in Hawaii through June 29, 1974 totaled 390,764 short tons, 96° basis compared with 542,331 tons for the same period a year earlier. The significantly lower production in 1974 is attributable in part to the strike of the International Longshoremen's and Warehousemen's Union (ILWU) which closed the Hawaiian sugar plantations from March 9 through April 16.

The Department of Agriculture's Crop Reporting Board, based on July 1, 1974 conditions, estimated that growers planted 1.25 million acres of sugarbeets in 1974. This was two percent less than the 1.28 million acres planted a year earlier. Acreage of sugarbeets for harvest was estimated at 1.20 million acres, down two percent from the 1.22 million acres harvested in 1973. A jump in plantings of 80 percent in North Dakota and 42 percent in Minnesota partially offset the substantial decrease in acreage in three other states. Planted acreage was down 41 percent in Idaho, 32 percent in Washington and 15 percent in California.

Plantings were delayed by wet fields in North Dakota and Minnesota. Because of unfavorable conditions, some growers were allowed to plant more acreage than had been contracted. The crop in Michigan and Idaho was also planted later than normal and some replanting was necessary in Michigan due to poor germination. The crop is making good progress in other states. Favorable conditions in Colorado resulted in plantings being completed a week earlier than normal, and excellent growing conditions have prevailed.

The Crop Reporting Board estimated the acreage of sugarcane planted in Florida, Louisiana and Texas for harvest in 1974 at 642,000 acres, up three percent from the 625,000 acres harvested in 1973. All of the increase in acreage is expected in Florida and Texas where both crops were damaged by freezing weather last year. Louisiana growers plan a two percent reduction in acreage. The harvested acreage in Hawaii is expected to be down eight percent this year as the result of a strike earlier in the year which halted all operations for about six weeks.

1/ Spot prices are for bulk sugar under Contract No 10, duty paid or duty free, full duty rate .625 cents per pound.

2/ Spot prices are for bulk sugar under Contract No. 11, which, beginning on Jan 1, 1971 replaces Contract No 8. The terms of these contracts are f.o.b. and stowed at Greater Caribbean ports including Brazil.

3/ The No. 10 "Domestic bulk" contract has been adjusted by deducting duty (.625¢) computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges before calculating the differential from the "World Contract" spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices, add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Report No. 230, July 1971, pages 6 to 23.
